

CIDERS & PERRIES (with % Alcohol by Volume)

Real Cider and Perry is pressed annually during the autumn months, September and October. After fermentation from wild yeasts which naturally occur in the fruit, it is left for months to mature, often in wooden casks which help to provide complex flavours during the final stages. We have sourced a variety of different ciders and perries from cider makers in many counties across England and Wales. This is a guide to what you can expect at the Festival, although due to the nature of supply the list may be updated on the day. Please check the Cider/Perry Bar for a comprehensive list of available ciders and perries.
